

Money Fast: 10 Ways To Accelerate Your Cash Flow NOW!

1. Call past or existing clients to see if they need or want anything that you can provide immediately.
2. Sell items you're no longer using on line (especially on Amazon) or have a garage sale, you're probably sitting (and/or paying monthly storage fees) on a gold mine. **Clear out your clutter!**
3. Reach out to local businesses and other entrepreneurs that compliment what you offer (but not compete) and propose bundling your service with theirs.
4. If you like to teach, reach out to a local business and see if you could come in and teach a class either a one day or a group of classes. I've created a sample proposal that you're welcome to model, come to my [next complimentary live tele-training](#) and I'll share with you how you can get a copy.
5. If you're active on social media, especially Facebook, offer your products/ services for sale. You can do this via a promoted post or Facebook Offer, if you currently have a business or fan page.
6. If you sell consumer goods geared for women offer them for sale on Pinterest and consider adding time limits on your offerings if you want buyers to move quickly. Here's another bonus tip: **Saturday is best shopping day on Pinterest!**
7. Give yourself an instant raise by raising your prices. But before you do, know your numbers. You must know not only you need to earn each month but what you want to make before you set your prices.
8. Get involved with groups especially Facebook groups and see what people are complaining about or asking for, if you can provide a solution reach out to them and offer a free consult.
9. Create and review a cash flow acknowledgement spreadsheet (**I'll speak more about this on the [complimentary tele-training](#)**) to see where your money is coming from currently. Next ask yourself, "Is there more money available from these sources?" Remember, it's easier to get repeat business from a current or previous client, than a person you've never done business with before.

10. Look at your current expenses and see where you make adjustments. For example, are you paying monthly or recurring fees for services you aren't enjoying or using? If so readjust or redirect those funds.

If you have services you need and regularly use try to pay upfront for a year or six months. Usually you can get price breaks if you pay in advance front freeing up your monthly cash flow. Extend the same opportunity for your clients. Some people will more than happy to pay for monthly services in advance.

Also if you offer payment plans mark up the final price by at least 10%. Don't eat processing fees, build them into your final price.

Bonus Tip: Make it easy for customers to give you money. Today you must have a mobile payment solution like Square, Paypal Here or Intuit to accept on location payments. When someone says they're ready to move forward collect some form of payment immediately!

Looking for more ways to find more clients, stay focused and grow your business?

If you got one idea today that you can use to increase your cash flow then I invite you to join me for upcoming complimentary tele-training where I will teach you how to create your own personal **Cash Flow Plan in 4 easy steps!**
